Cometic Gasket, Inc., is a leading worldwide supplier of gaskets and engine sealing solutions for the Automotive Performance, Powersports, Original Equipment and Remanufactured Engine Industries.

All Cometic products are made in the United States with materials manufactured on American soil.

Launched by four partners including current Founder and CEO Bob Gorman in 1989, Cometic was originally dedicated exclusively to the powersports industry. Operating from a tiny 1,500 square foot manufacturing facility, the company produced a mere 900 SKUs in its first year.

Fast-forward to Cometic's 25th Anniversary in 2014. The company is now wholly owned by the Gorman family - and has grown into a global leader and innovator in the highly competitive engine supplier marketplace.

Housed in a 70,000 square-foot, state-of-the-art R&D and manufacturing center in Concord, Ohio, Cometic Gasket has maintained its deep roots in the powersports industry while expanding to service the Domestic Automotive, Sport Compact, V-twin, Marine, Diesel, Agricultural, Industrial and Stationary Power markets.

Today, Cometic Gasket offers over 85,000 SKUs, shipping gaskets and engine sealing solutions across the globe. Cometic is dedicated to customer satisfaction and provides quality products, delivered on time at a competitive price, designed for each customer's specific application. Cometic is an industry leader in manufacturing processes and committed to pairing the highest possible

quality materials with knowledgeable personnel. Cometic is also dedicated to continually improving all areas of its operations through employee development and involvement, as well as continual and comprehensive reviews of customer feedback.

To ensure superior performance across a wide variety of engine types and sizes, Cometic manufactures gaskets from a comprehensive range of materials. Whether the situation calls for the latest in advanced technology like the MLS (Multi-Layer Steel) Gasket, or a synthetic blend such as Aramid Fiber, Cometic finds a solution. Cometic stays on the forefront of gasket design technology by utilizing in-house dynamometers and engine assembly rooms to bring its distributors, retailers and ultimately the end-user, the most reliable gaskets available today.

Cometic combines advanced materials with the most current manufacturing processes to provide custom-tailored solutions to meet the needs of each individual customer. Engineers analyze the environment in which the gasket will perform, select the proper material, and apply the appropriate technology to offer the best-performing gaskets available in today's ever-changing marketplace. Cometic gaskets are the industry standard for championship-winning teams across multiple disciplines of both professional and amateur motorsports.

Today's lightweight engines are producing more horsepower, higher cylinder pressures, clamp loads and extreme temperatures. Our commitment is to provide innovative, quality gaskets while maximizing your engine's power and performance. Cometic's gaskets are proudly made in the USA with materials manufactured on American soil. We are constantly updating and adding models to our ever growing library of gaskets.

Be sure to check out our NEW Clutch and Mag Kits made from AFM Material. AFM will not stick to the engine case making replacement quick and easy, no more scraping. The aluminum core gives the gasket strength for a superior seal and prevents the gasket from weeping or crawling out. All gasket kits (Top-End, Bottom-End, Clutch and Mag) are sold with the proper amount of gaskets for one application. Need just one gasket, not the entire kit? No problem, we offer individual gaskets.

Cometic is a proud sponsor of Ricky Carmichael, Team Green, The Orange Brigade & Kawasaki Factory Motocross to name a few.

GASKET MATERIALS

MLS® Multi Layer Steel Gaskets

The Cometic MLS gasket is comprised of three to five layers of Stainless Steel. Cometic uses Stainless steel for increased strength, its ability to rebound and corrosion resistance. The outer layers of the gasket are embossed and coated on both sides with a Viton rubber material designed to meet the demands of a variety of harsh sealing environments, load conditions and surface finishes. The Viton coating is heat resistant to 250C or 482F.

The center or shim layer of the gasket is comprised of an uncoated Stainless Steel layer, which can be varied to accommodate multiple thickness requirements. The MLS gasket is ideal for any kind of head and block combination.

By design the MLS gasket promotes an even torque load across the sealing surface allowing for measurable reduced bore distortion.

AFM (Aluminum Foam Material)

AFM is a chemically blown, compounded nitrile synthetic rubber bonded to an aluminum core with temperature resistance of over 250F. AFM material has an 85% recovery while maintaining strong torque retention. AFM does not require gasket sealers or re-tightening.

Available thickness: .018", .032", .060"

Rubber Coated Stainless Steel

A stainless steel core with a .001" thick coating of viton rubber on both sides.

Available thickness: .010", .014", .020"

Aramid Fiber

Is a premium hi-temperature, hi-density creep resistant material that requires no re-torquing and is fuel resistant. All Cometic fiber materials are asbestos free and require no additional sealants.

Available thickness: .012", .015", .020", .031", .039", .047", .060", .094", .125", .188

Cometic MLS Head Gasket Instructions for Harley Davidson Evolution & Twin Cam applications

NOTE: DO NOT USE THE CYLINDER HEAD ALIGNMENT DOWEL O-RING WHEN USING AN MLS GASKET.

NOTE: COMETIC GASKET RECOMMENDS THE HEAD BOLTS BE SET AT A FINAL TORQUE OF 42FT-LBS.

1. Check all gasket surfaces for flatness and imperfections, an excessively rough finish may cause gasket failure. A 50RA surface is recommended.
2. Check all hardware for defects, clean all threads and lubricate with light machine oil. Including the underside flange of the head bolts. (Wipe away any excess.)
3. There are two short and two long head bolts. The short go on the spark plug side while the long go on the pushrod side.
4. Before installing the head, place the head gasket on the cylinder and locate the gasket using the cylinder head alignment dowels (NOTE: The gasket is embossed around the dowel area and the dowel holes are smaller. Do not use dowel alignment o-rings with an MLS gasket.)
5. Once the gasket is located in place make sure the gasket fits your bore. The gasket should not hang in the bore or combustion chamber in any area.
6. If using a head or cylinder other than stock, check brass rivet location to ensure the rivet does not interfere with the sealing surface in any way. Some aftermarket castings are substantially larger than stock castings and may interfere. Simply remove the brass rivets, "side cutters work well".
7. Once proper fitment is established proceed with head installation and torque. (NOTE: See illustration for sequence.)
8. Alternately snug all the head bolts finger tight.
9. In sequence tighten all head bolts to 9 ft-lbs. Then in sequence tighten all head bolts to 14 ft-lbs. Again in sequence tighten all head bolts to 22 ft-lbs. Then in sequence tighten all head bolts to 35 ft-lbs and finally torque all head bolts to a final torque of 42ft-lbs in sequence.

Note: Failure to comply with any or all of these instructions may result in premature failure of the head and or base gasket.

Note: All Panhead, Shovelhead & Iron Sportster models use factory specs when using an MLS head gasket.
