MLS Gaskets are comprised of multiple embossed layers of both viton coated and uncoated stainless steel. The embossed outer layers of the gaskets meet the demands of a variety of harsh sealing environments, load conditions and surface finishes. This design requires less clamp load creating less bore distortion and conforms load distribution across the sealing area. The center or shim layer is an uncoated stainless steel layer which can be varied to accommodate multiple thickness requirements. No sealants or re-torque required.

MLx Multi Layer Xtreme Steel HEAD GASKETS

MLx Gaskets feature a unique, integrated "stopper" layer. The positive locking ring ("stopper" feature) seals the combustion chamber and improves clamp load without excess bore distortion. Available for most aftermarket cylinder heads. No sealants or re-torque required.
