

## TRUCK MAGNUM™ MUDFLAPS

- ◆ All Magnum Mudflaps products are made and assembled entirely in the USA
- ◆ Our hitch mounted mud flaps for trucks, unlike other mud flaps systems, have a full length design that covers the entire width of your truck or SUV
- ◆ Hitch mounted mud flaps can prolong the life of your boat, camper, or whatever you are towing by protecting them from harmful road debris that chips, scratches, scuffs, and rusts surfaces
- ◆ Magnum™ Mudflaps for trucks fit on the most popular vehicle models: Chevy, Nissan, GMC, Toyota, Dodge, and Ford

## ATV MAGNUM™ MUDFLAPS

- ◆ All Magnum Mudflaps products are made and assembled entirely in the USA
- ◆ ATV mud flaps are a farmers best friend, working as a mud guard, these mud flaps will keep mud and dirt away from what you are towing eliminating clean up – saving time and money
- ◆ ATV mud flaps are perfect for keeping ice, slush, and water off of your portable ice sled for winter ice fishing
- ◆ ATV mud flaps attach easily on the hitch of the most popular ATV models: Polaris, Yamaha, Kawasaki, Honda, Suzuki, CF Moto, Can-AM, and Arctic Cat
- ◆ ATV mud flaps work as mud guards perfect for trail riders, making sure your ATV is not kicking up debris that could endanger riders behind you or yourself.

## UTV MAGNUM™ MUDFLAPS

- ◆ All Magnum Mudflaps products are made and assembled entirely in the USA
- ◆ UTV mud flaps are a farmers best friend, working as a mud guard, these mud flaps will keep mud and dirt away from what you are towing eliminating clean up – saving time and money
- ◆ UTV mud flaps are perfect for keeping ice, slush, and water off of your portable ice sled for winter ice fishing
- ◆ UTV mud flaps attach easily on the hitch of the most popular ATV models: Polaris, Yamaha, Kawasaki, Honda, Suzuki, John Deere, Can-AM, Kubota, Bob-Cat, Pug, and Arctic Cat
- ◆ UTV mud flaps work as mud guards perfect for trail riders, making sure your UTV is not kicking up debris that could endanger riders behind you or yourself.

## ICEMASTER TRACK AND TIRE STUDS

Icemaster Screw In Track Studs provide positive control for snowmobiles on ice and snow.

**SNOWMOBILERS:** With our Icemaster Screw-In Track Studs you can get lateral traction, acceleration and braking for your sled without drilling your track. Icemasters are easy to install – they screw into the top of the lug for best bite and they require no drilling. With today's high profile tracks, push-thru studs have to be longer and heavier which increases their cost, weight and rotating mass. Our Icemasters offer significant weight savings.

**HILLCLIMBERS:** add these to your deep-lug paddle tracks for extra traction on those icy spots. You'll love the extra bite you get. Beat everyone to the top. Large 70 degree brazed carbide tip for superior traction on all terrain. In packages of 100 or 250.

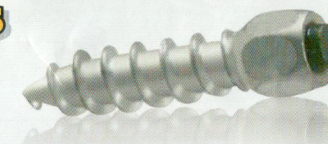

Available in 3 Lengths

RTS-2	1/2" long thread for lugs less than 1"
RTS-3	3/4" long thread for lugs 1" to 1-1/4"
RTS-4	1" long thread for lugs over 1-1/4"

NOTE!! Do not install Gripmasters in any lug or part of the lug less than 1/2" thick.

## SCREW-IN CARBIDE TIRE STUDS FOR ATV'S AND UTV'S

Get Icemaster ATS Screw-In Tire Studs for control of your ATV or UTV on ice. For hunters, fishermen, campers – all outdoorsmen and sportsmen. Icemasters are easy to install, (no drilling required) they last for several seasons and they'll give you the bite you need. Then at the end of the season, they can be removed, stored and installed again next winter.

- Provide positive traction on ice
- Can be removed at the end of the season
- Brazed construction – not epoxied like Maxi-Grip studs

Available in 2 Lengths

ATS-15	minimum tread depth 5/8"
ATS-18	minimum tread depth 7/8"

All packages include installation tool.

## SHOCK COVERS

Snowstuds™ shock covers improve the performance and appearance of your ATV or Snowmobile shocks. These high quality and durable shock covers were developed to prolong the life of your shocks, even in the most extreme conditions. Manufactured from strong, heavy-duty materials, these covers conceal the entire shock and securely attach to any make with Velcro® fasteners.

## E-Z STUD FINDER

TRACK LUG HEIGHT	3/4"	7/8"	1.0"	1-1/8"	1-1/4"	1-3/8"	1-1/2"	1-5/8"	1-3/4"	2.0"	AMOUNT OF PENETRATION
Size 80	3/8"	1/4"									
Size 81	1/2"	3/8"	1/4"								
Size 82		1/2"	3/8"	1/4"							
Size 83			1/2"	3/8"	1/4"						
Size 84				1/2"	3/8"	1/4"					
Size 85					1/2"	3/8"	1/4"				
Size 86						1/2"	3/8"	1/4"			
Size 87							1/2"	3/8"	1/4"		
Size 88								1/2"	3/8"	1/4"	

■ Not Effective    ■ Not Recommended

We recommend the following for your application:

- 1/4" penetration for added safety on icy surfaces, or when using reduced stud quantities – up to 96 studs
- 3/8" penetration for trail performance and excellent grip in all conditions – 96 to 240 studs
- 1/2" penetration for the advanced needs of racing only. Not recommended for typical trail riding.

IT IS A MUST TO CHECK TUNNEL CLEARANCE.

\*\*\* Actual penetration depends on many variables, especially actual track thickness (the belt and lug combined), and backer type used. Snowstuds.com traction products are engineered to match your track size and performance expectations as close as possible.

When ordering studs, start with the part number listed, followed by the quantity

Example: Order # Part # Qty  
W80C96 W80C + 96 = Warthogs .875" in a 96 count package  
T84SX48 T84SX + 48 = Terminator 1.38" Shovel Tip in a 48 count package

### Competitors Comparison Chart

SNOWSTUDS PART #	SNOWSTUDS SIZE	MFG. A SIZE	MFG. B SIZE
Size 80	0.875"	0.875"/0.920"	0.875"/0.960"
Size 81	1.00"	1.00"	1.00"
